Kolkata, WB | sissar99@gmail.com | LinkedIn | Github | Portfolio

Professional Summary

Motivated Software Engineer with hands-on experience in designing, developing, and maintaining web-based applications. Proficient in HTML, CSS, JavaScript, and Java, with a strong foundation in Data Structures, Algorithms, SQL, and core software engineering principles. Experienced in translating functional requirements into efficient, maintainable code while focusing on performance, scalability, and user experience. A quick learner and collaborative team player, committed to continuous improvement and delivering high-quality software solutions.

Skills

- **Frontend Technologies:** HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, UI Development, Cross-Browser Compatibility
- **Programming Languages:** Java, JavaScript, C, SQL
- **Software Engineering Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems
- **Web & Application Development:** DOM Manipulation, RESTful APIs, Client-Side Rendering, Basic Backend Integration
- **Tools & Version Control:** Git, GitHub, VS Code, Chrome DevTools
- **Development Methodologies:** Agile, SDLC, Debugging, Code Optimization, Problem Solving
- **Certifications:** Web Development (Euphoria), Python Programming (Coursera), HTML & CSS Portfolio Development (Coursera), Java Certification (HackerRank), C Certification (HackerRank)

Professional Experience

Benda Infotech

Jul 2025 – Present

Frontend Developer (Kolkata, India)

- Developing responsive and interactive web applications using HTML, CSS, and JavaScript.
- Implementing user interface components based on design specifications and business requirements.
- Collaborating with backend developers to integrate APIs and ensure seamless data flow.
- Optimizing web applications for performance, usability, and cross-browser compatibility.
- Debugging, testing, and maintaining frontend code to improve application reliability and scalability.
- Following Agile development practices and version control using Git/GitHub.

Persistent Systems

Jun 2023 – Aug 2023

Software Engineering Intern (Martian Summer Internship) (Kolkata, India)

- Gained hands-on experience in Java programming, Data Structures, DBMS, and Operating Systems.
- Contributed to an Online Grocery Ordering System, focusing on application logic and basic UI components.
- Assisted in designing and implementing core features such as product management and order confirmation.
- Worked on debugging and testing modules to improve system functionality.
- Developed a strong understanding of software development lifecycle (SDLC) and team-based development.

Education

Narula Institute of Technology

2020 – 2024

Bachelor of Technology in Computer Science Engineering
CGPA: 7.91

Kolkata, WB

Projects

Online Grocery Ordering System

- Developed a web-based application to manage grocery products, orders, payments, and order confirmation.
- Implemented core functionalities such as product listing, order placement, and order tracking.
- Worked with Java and basic web technologies while following software development lifecycle practices.
- Focused on improving system usability, data handling, and application flow.

Weather Application

Go Live

- Built a weather application to display real-time climate updates for different locations.
- Implemented dynamic data rendering using HTML, CSS, and JavaScript.
- Ensured clean UI design and responsive layout for better user experience.

Tic Tac Toe Game

- Designed and developed a console-based Tic Tac Toe game using Java.
- Applied core programming concepts such as conditional logic, loops, and object-oriented principles.
- Enhanced problem-solving skills through game logic implementation.

Personal Portfolio Website

Go Live

- Created a responsive personal portfolio website using HTML and CSS.
- Showcased skills, projects, and contact information with a clean and structured layout.
- Focused on UI design, responsiveness, and cross-device compatibility.
